Ronak Varshney

Full Stack Software Engineer | MERN, Next.js, Nestjs | TypeScript | AI/LLM & Agentic Workflows | Building Scalable & Production-Ready Systems

Greater Agra Area

Summary

Hi, I'm Ronak Varshney Software Engineer, About Me I'm a Software Development Engineer I at The Squirrel, passionate about building scalable, high-performance applications that solve real-world problems. I work across the full stack, designing and delivering robust systems using React, Next.js, Node.js, TypeScript, and modern backend architectures—ranging from secure APIs and real-time systems to AI-powered platforms. Throughout my journey, I've contributed to production-grade applications, optimized backend and frontend performance, refactored legacy codebases into maintainable architectures, and implemented secure authentication and authorization flows. I enjoy working at the intersection of clean code, performance, and user experience, transforming complex ideas into reliable and scalable products. I don't just write code—I aim to create impact, elevate teams, and build systems that scale with ambition.

Key Achievements & Contributions

- Built and shipped production-ready full-stack features across web and mobile platforms
- Improved application performance, reliability, and maintainability through TypeScript refactors and modular architectures
- Designed and optimized secure backend APIs, authentication flows, and real-time features
- Solved 500+ DSA problems on LeetCode and GeeksforGeeks
- Actively contribute to open-source contributor, including GSSOC'24/25 and HacktoberFest.
- Continuously exploring AI systems, scalable architectures, and modern CI/CD workflows

Tech Stack

Languages: JavaScript, TypeScript, Python, C/C++

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI, Framer Motion, Redux Toolkit, Zustand

Backend: Node.js, Express.js, NestJS, Auth.js, Passport.js, Clerk

Databases: PostgreSQL, MySQL, MongoDB, Prisma, Mongoose, Redis

DevOps & Tools: Docker, Linux (Ubuntu), Git, GitHub, CI/CD (learning)

AI Development Stacks : Langchain , LangGraph , RAG pipelines

Core CS: DSA, DBMS, OS, CN, OOPS, System Design (learning)

SoftSkill: Leadership,

CommunicationFreelance & Side Projects• Figma to Code using React / Next.js• Backend API development (REST & scalable systems)• Bug fixing and performance optimization• Small to mid-scale full-stack projects• MVP development for startupsLet's ConnectI'm open to collaborations, freelance work, open-source contributions, and new opportunities.Email: ronakvarshney7100@gmail.comLeetCode: RonakVarshneyLet's connect and build technology that truly matters.

Experience

The Squirrel

9 months

Full Stack Developer

August 2025 - April 2026 (9 months)

Tech Stack: Proficient in backend development using Node.js, Express.js, and TypeScript, with hands-on experience in building scalable systems. Skilled in developing and integrating RAG (Retrieval-Augmented Generation) pipelines and implementing LLM-powered chatbots to enable intelligent, context-aware applications.

Frontend Developer

August 2025 - September 2025 (2 months)

Developed and maintained full-stack web applications with a strong emphasis on backend engineering, scalability, and performance optimization

Designed and optimized RESTful APIs, ensuring efficient data handling and seamless frontend-backend integration

Converted 10+ Figma designs into responsive, production-ready user interfaces with high design fidelity and cross-device compatibility

Contributed to international (foreign) projects, collaborating with global teams and adapting to diverse requirements and workflows

Implemented SEO best practices, including on-page optimization, meta tagging, and performance tuning to improve search engine rankings and visibility

Leveraged Large Language Models (LLMs) to streamline content generation, automate workflows, and enhance development productivity

Utilized modern development tools and code editors to write clean, maintainable, and efficient code, with a strong focus on debugging and optimization

Collaborated with cross-functional teams to deliver feature enhancements, resolve issues, and improve overall product quality and user experience

Hacktoberfest

Hacktoberfest '25 Contributor

September 2025 - October 2025 (2 months)

Contributed to multiple open-source repositories during Hacktoberfest 2025 by submitting meaningful pull requests and collaborating with maintainers.

Strengthened my understanding of version control, code reviews, and community-driven development. Earned the official Hacktoberfest 2025 T-shirt as recognition for my contributions.

Bluestock™

SDE Intern

February 2025 - March 2025 (2 months)

GirlScript Summer of Code

Open Source Contributor 2024 & 25

November 2024 - January 2025 (3 months)

Education

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology - BTech, Computer Science · (September 2022 - September 2026)

Aligarh College of Engineering and Technology

Bachelor of Technology - BTech, Computer Science · (September 2022 - September 2026)

Dharam samaj Bal mandir Sr. Sec School

Intermediate, Physics chemistry Math · (January 2022 - January 2023)
